

Average crop from an
apiary 175kg/hive

How possible?

Lehtonen Beekeeping

Honey since 1962

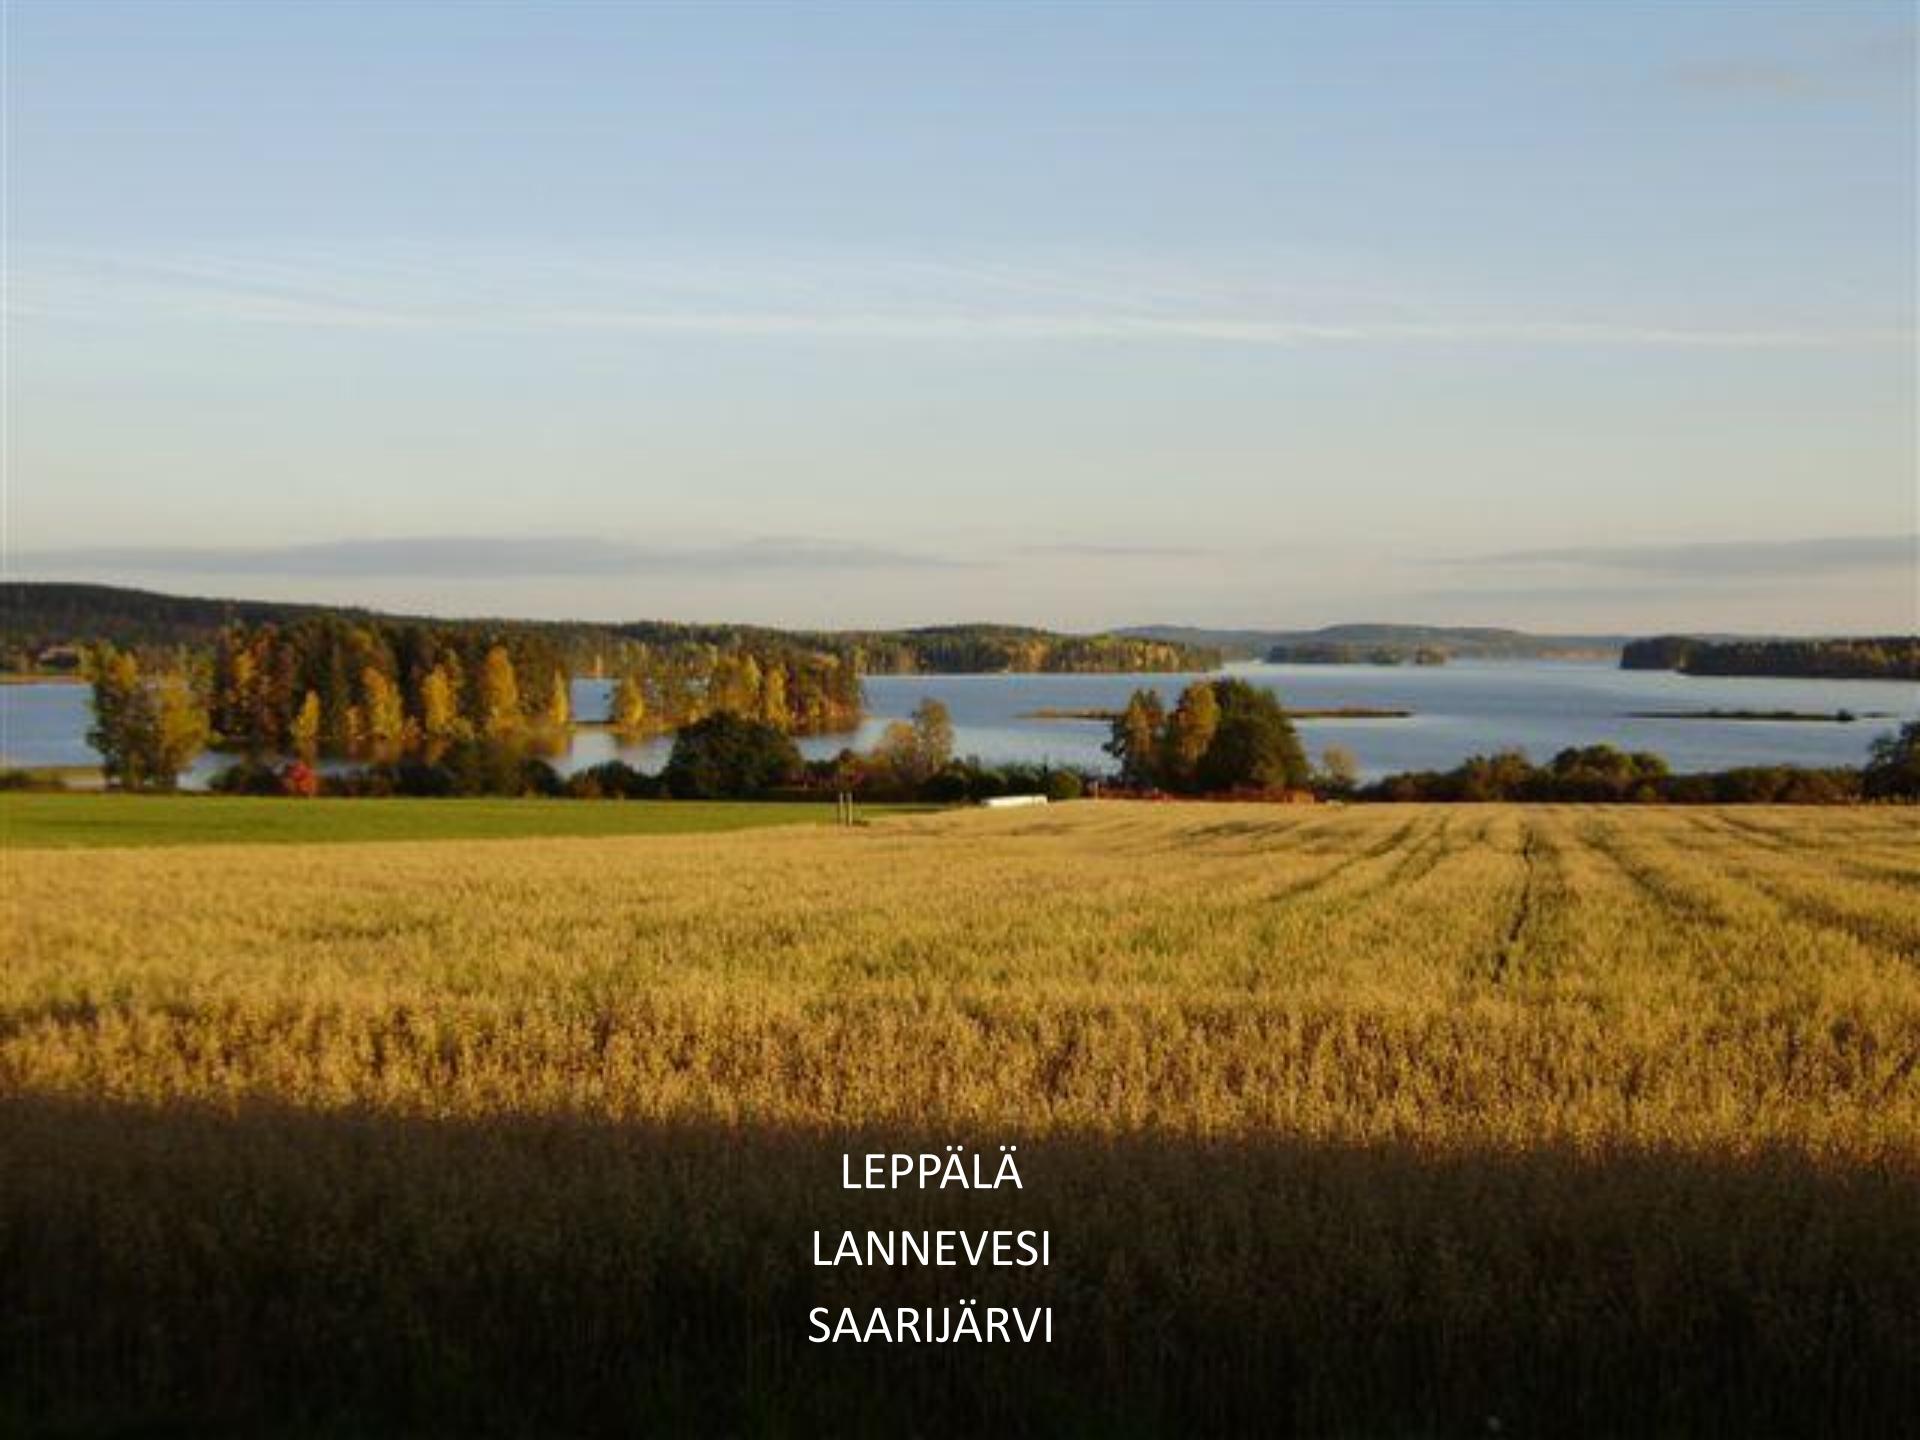

Influencing factors

- The kind of bees
- Management
- Apiary site
- Weather, weather, weather

Pyhä-queens

- Risto Pykälämäki 040-7607652
- Jorma Sahinaho 0400-958752
- Veikko Lehtonen 040-5226707

A wide-angle photograph of a rural landscape. In the foreground, there's a field of tall, golden-yellow grass or grain. Beyond the field, a body of water, likely a lake, stretches across the middle ground. The lake is framed by several small, green-covered islands. On the far shore, there's a dense forest of tall trees, some of which appear to have autumn-colored leaves. In the background, a range of hills or low mountains is visible under a clear blue sky.

LEPPÄLÄ
LANNEVESI
SAARIJÄRVI

Hive in fall (Farrar 1944)

Productive queen

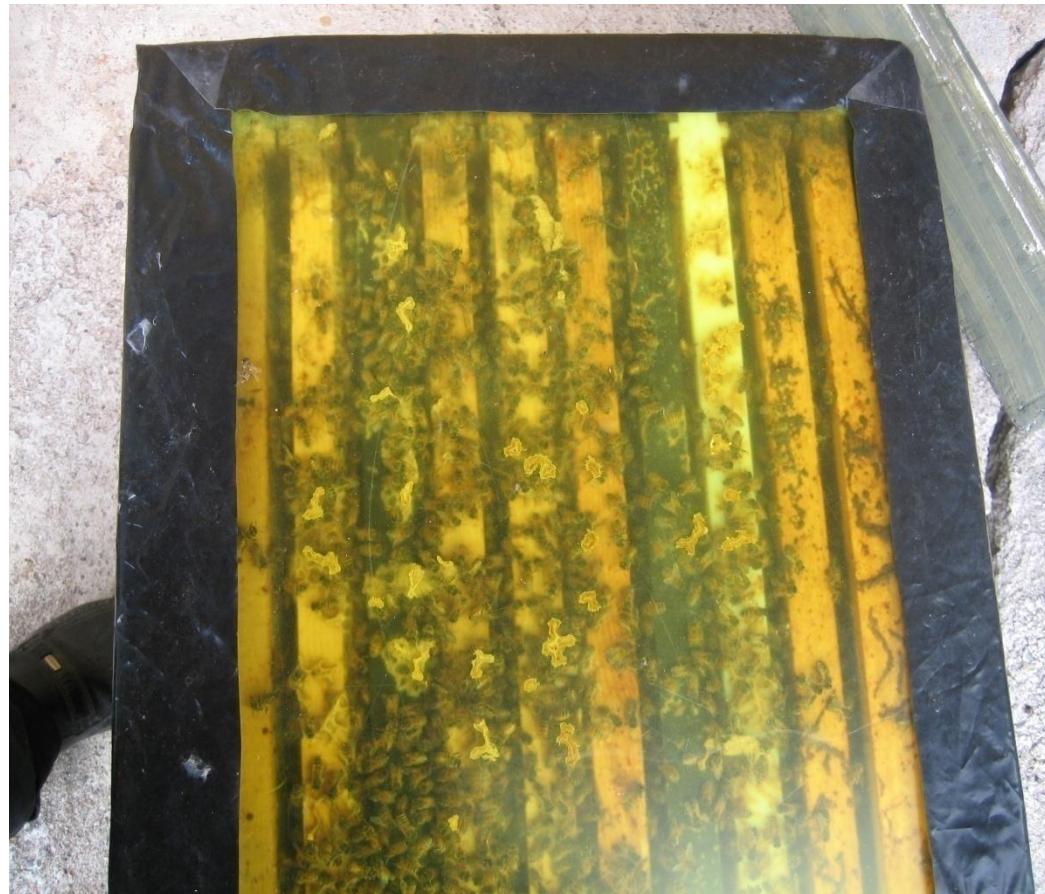

Bees in 20 frames

Feed 32kg

Sunny apiary

Protected from winds

3-5 frames of pollen

Winter 2010

**Plastic cover on until honey boxes
added**

First cropping July 10. 2010

Final cropping August 6 2010

Thanks !
